**Big expertise. Real convenience. Concrete commitment.**

**Mine Shine is a non-phosphate formulation and will not contribute to blue green algae growth in local water courses.**

Mine Shine is a premium high foaming Quick Break detergent manufactured from biodegradable additives and compatible with all makes of oil and water separators and water recycling systems. The non-use of quality Quick Break products, poor work practices by employees and a lack of knowledge and hands-on experience from the vast majority of cleaning chemical suppliers are major contributors to environmental contamination within the mining, industrial and transport sectors. In fact, about 90 per cent of effluent problems currently experienced on washdown pads and in work shops within these sectors can be attributed to these factors. Because there are no standards in place, cleaning chemical suppliers are free to use the terms 'Quick Break' and 'Environmentally Friendly' when in fact this may not be the case. In broad terms, a quality Quick Break product offers rapid degradation of cleaning agents, superior cleaning ability and deemulsifying ability when the cleaning process is completed.

## Product Description

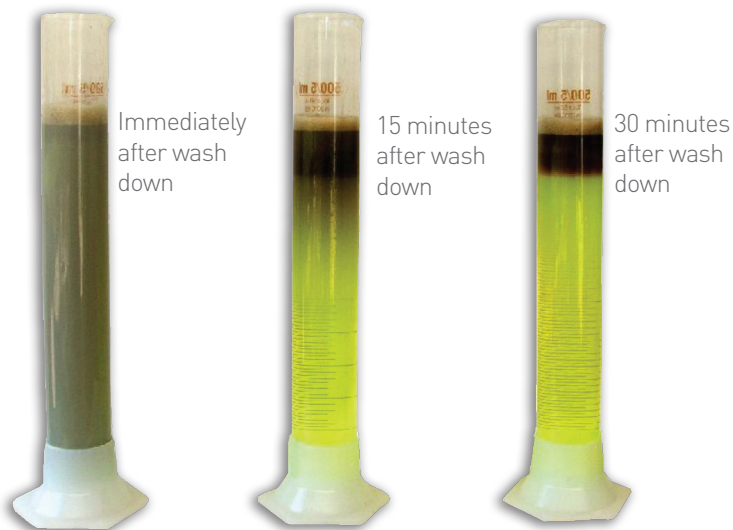

### Application

Mine Shine is a general purpose biodegradable Quick Break detergent with the cleaning ability to remove oil, light grease, stack carbon, coal and dirt from heavy equipment.

The Mine Shine's unique additive package ensures rapid degradation of the cleaning solution and provides customers with the comfort of knowing that it is compatible with all makes and brands of oil and water separators and water recycling systems.

Mine Shine is designed for use in the industrial and mining industries where there is a requirement for a quality maintenance cleaner. Mine Shine can be sprayed or foamed onto the work surface, left to dwell for a short time then rinsed with high pressure water.

Code	Size
MSVW15	15 Litre

## Features and Benefits

<b>Quality Quick Break</b>	Compatible with all makes of modern effluent equipment.
<b>Biodegradable</b>	Environmentally friendly.
<b>Moderate pH</b>	End-user friendly.
<b>Highly Concentrated</b>	Economical to use.
<b>High foaming</b>	Improved cleaning ability.
<b>Low odour</b>	Suitable for underground use.

## Method of Use

<b>Heavy equipment</b>	1:10
<b>Engines</b>	1:1 to 1:4
<b>Work shop floors</b>	1:4 to 1:10

**For additional information refer to MSDS.**

## CONDITIONS OF SALE:

These goods are manufactured and tested to specific standards and are sold in good faith, however, no guarantee is given as the conditions and methods under which they are used are beyond the control of Form Direct. Before using, user should determine the suitability of the product for the intended use and user assumes the risk and liability in connection therewith.

## WARRANTY:

The manufacturer guarantees and warrants that the content and that total net volume are as stated within lawful limits. Liability of Form Direct under this warranty or otherwise shall be limited to refund of the purchase price and such refund is expressly agreed by the buyer to be the exclusive remedy. Form Direct makes no other expressed or implied guarantee, warranty or representation, including warranties of merchantability and fitness for a purpose except to the extent required under statute. Form Direct shall not be liable for direct, consequential or incidental damages through misuse or abuse or for any use contrary to the explicit use detailed on the label. No modifications of this warranty and the disclaimers herein are authorised or valid unless expressed in writing and signed by Form Direct.
